

MICRO CUTTING TOOLS

für Aluminium (MMKS u. Trockenbearbeitung), PMMA, PE, PTFE

for aluminium (MQL & dry processing), PMMA, PE, PTFE

A schematic diagram of a tapered shaft. The shaft has a total length l_1 . It consists of a cylindrical section of length l_2 on the left with diameter d_1 , a tapered section of length l_3 in the middle, and a cylindrical section of length l_4 on the right with diameter d_2 . The tapered section is shown with a wavy line representing a surface defect. The angle of the taper is denoted by ϕ .
